QC and QML Hackathon

You love to implement cutting-edge methods and technologies such as generative AI and quantum computing? Coding is your passion, and you want to know more about practical use cases, e.g., in finance and banking? Then you should participate in our co-hosted Quantum Computing (QC) and Quantum Machine Learning (QML) Hackathon! Get the chance to analyze data, develop innovative models, and learn with the support of experts how to, e.g., combine ML algorithms and quantum computing! Choose between many different QC/QML applications such as quantum optimization, quantum-safe cryptography, or explainable AI, and solve interesting problems. Meet like-minded people, exchange your knowledge, and benefit from an inspiring atmosphere during an exciting weekend.

Who: Students, graduates and young professionals with analytical minds

Where: ING-DiBa AG, Theodor-Heuss-Allee 2, 60486 Frankfurt am Main

How: Application until 15th March 2024 at: www.ing-events.com/qcandqmlhackathon
Travelling expenses and accommodation will be covered after consultation.
